

NBS continues its evolution with the launch of a new website...

Rising EMS star NBS has unveiled a new website showcasing its new corporate logo and emergence as a significant player in the famed Silicon Valley electronics market. Beginning with its merger with CompServ in January 2009, its

resulting new senior management team headed by President & CEO Michael Maslana, NBS has embarked upon a campaign to raise its profile and expand service offerings.

NBS' Sales & Marketing VP Chris Alessio explains: "We are proud to proclaim we are the evolution in EMS. A key element in our customer outreach is our web presence. Internet visits are frequently the initial introduction to our future clients. We endeavored for this website to engage the visitor with an attractive look, provide ease of use, and most importantly useful information. Incorporating new features such as a member login providing exclusive access to informative downloads and updates, a news center and engaging layout, I think we've delivered this."

www.nbscorp.com is built around a unique homepage design characterized by a tab navigation structure that provides visitors with 1-click access to relevant information. The website categorizes content in terms of key NBS services – enabling them to choose from Engineering, Manufacturing, Materials, Test, and Logistics. In addition,

website visitors can also view content by market sector, spanning Networking & Telecom, Industrial Control, Semiconductor, Medical, Military & Automotive, and Solar & Green Technology. Alessio adds: “We are pleased with our new website and are confident that the design will engage our customers and help them find exactly what they’re looking for.”
