

NBS awarded AS9100 Certification for design and assembly

Leading EMS provider NBS (www.nbscorp.com) today announced their achievement of AS9100 certification for both design and assembly at their Santa Clara, CA manufacturing headquarters. Certification was granted by SGS Group

following the successful completion of an exhaustive and comprehensive audit of the company's quality processes.

AS9100 is the quality management system (QMS) standard specific to the aerospace industry. The current version includes all of the ISO 9001:2000 standard plus supplementary processes that address the stringent quality requirements of the international aerospace industry, from commercial aviation to defense.

"Safety, quality and reliability are critical principles both to us and to the aerospace industry." emphasized NBS President and CEO Michael Maslana. "Achieving this certification for design as well as for assembly further substantiates our commitment and ability to comprehensively satisfy their complex and unique demands."

NBS' end-to-end product solutions span PCB layout and advanced SMT assembly through to integration services specially designed to support unique and innovative business models. In addition to backplane, cable and harness and enclosure assembly, they provide design and engineering support and hardware/software integration services. The company's sophisticated Build to Order (BTO) and Configure to Order (CTO) services further include reverse logistics and RMA capabilities as well as system test and burn in.
